

COLPAI Project – Basterfield Service Road Installation of Netted Fan from Monday 30 November 2020

Dear Neighbour

As you may aware, the residential building at the COLPAI Project is progressing well and ISG will moving up to construct the fourth floor over the coming weeks.

To ensure we maintain a safe environment around the site perimeter, ISG will be erecting a projecting netted fan on the south face of building over the entrance to Basterfield Service Road. The netted fan will be secured from the inside of the new residential building and be fixed at a height of approximately 5 metres above ground. The netted fan will not impact on traffic movements or access to Basterfield Service Road below.

The netted fan will be installed from Monday 30 November 2020 and will remain in place until completion of level four, which we expect to take approximately three weeks.

We have included a site plan below to show the location of the netted fan as well as an example image of the type of fan that will be erected.

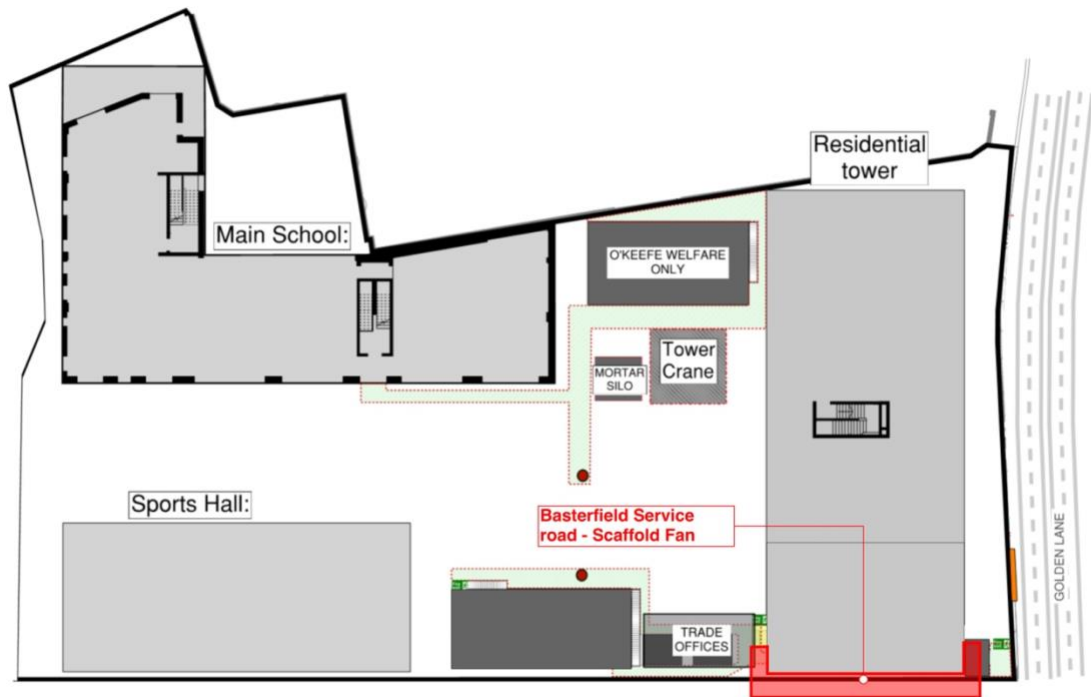

If you have any questions regarding the COLPAI Project, please do get in touch with the team on the details below.

Best wishes

COLPAI Project Team
